

My group decided they would prefer the option that had conferences on Tuesday from 3:30-6:30 and Wednesday from 11:00-7:30.

They also said the drinking fountains were a legitimate concern and would be ok with putting water fountains in the CTE hall. However, in talking with other LIT members, I'm realizing I didn't have all the actual information about the type of fountains, etc. to present to my group. Their minds may change when they hear about the \$3000 cost of the fountains as opposed to a regular drinking fountain.
